

Business advisory

The main objective of **Business Advisory** is to promote a profitable growth for your business by using state of the art information technology. Our working team is not limited to solving problems; it foresees coming situations which may represent opportunities or threats for your company. Our team provides you with an objective, multidisciplinary and professional perspective.

Based on an integral vision of business, we work together with our clients in order to develop and implement business solutions which render measurable results.

Some of the services we provide in this area are the following:

- strategic planning: setting mid-term and short-term objectives by identifying the necessary resources and means to do so
- companies' restructuration: implementation of mid-term extraordinary measures in order to eliminate crisis and to ensure business permanence
- processes optimization: review and design of processes so as to optimize them based on the business strategy
- cost management: establishment of controls in order to have a competitive cost and expense structure
- institutionalization of family companies: a harmonized management of family companies by keeping balance of three key elements: stockholding, business administration and family relations
- information technology: design and implementation of information systems for all of the company's levels: we take part in

selection projects and software implementation
