

# Outsourcing

The **Outsourcing** service represents a key element when developing your business management strategy. For it is an effective tool that strengthens the benefits of the small and medium-sized companies. It enables you to focus your attention on specific objectives and turns your structure into a more flexible one when facing changes in the economic environment. Furthermore, it increases competitiveness of your organization.

The **Outsourcing** service is not a new business concept, neither is the personalized support that Salles, Sainz – Grant Thornton, S.C. has delivered to the business community in Mexico for over 25 years. This service is specifically designed for companies which prefer to concentrate on the company's core business functions, and for entrepreneurs that choose to set-up a new business with the certainty that their books are being kept by experts.

This division delivers a variety of services that go from the procedures necessary to start-up a new business to the complex consulting assignments required to compete in today's global economy. Receiving this service will provide timely responses and significant cost reductions for your company.

Whether your company has offices or planning on having offices overseas, our global organization ensures that we can provide outplacement anywhere you need. We provide companies with offices in Mexico with an easy and low cost way to manage their international payroll. This way you would not have to dedicate scarce resources to provide a difficult and time-consuming service.

We absorb and assume your legal and labour obligations and responsibilities, by hiring your payroll into our laboural force. Since we are global and perfectly understand and manage Mexican payroll deductions and tax laws, we are your best option.

## Integrated services
